About the game: You play as Joe, a military pilot. A series of alien attacks on Earth have disrupted global communications, forcing Joe to depend on an old tattered map and a damaged radio. You are aware that the only way to your home base, a large space station where humanity is holed up, is through friendly space stations or enemy occupied space stations. And that the most vulnerable space station is the one closest to the enemy. Joe must travel to one of the space stations, climb inside and, assuming the attitude he's in, blast off into space, one of the most exciting parts of the game. The robot and space station partners all urge Joe to make it out alive, promising personal rewards for a job well done. The journey has a lot of dangers. Rockets, lasers, charging monsters, fall damage, spatial illusions, and much more are all in store for your journey. Will Joe make it? You can get full control over the game with the Steam controller, as well as a classic controller. Main features: 180+ stages of arcade-style action 5 characters and 3 different battle styles 5 different enemy types 6 weapons Atmospheric, Side-scrolling (with vertical foreground and background scrolling) and Mission-style gameplay modes No respawns and a fixed enemy attack pattern Endless endurance mode Over 140 extra firing bullets and a slow-motion recovery mechanic Good luck, Joe, and have fun! --- I understand that there are may be Copyright issues with this game.
